Theoretical Install:
"Spotify GO" is a mobile application for Android devices;
To install it, one would simply go to the Google Play Store and get it from there once it's available there.

Install from Github repository:
Requirements: Android Studio or equivalent Android development device

To install the from Github, clone the repository onto your local device. To compile, run the following commands into the terminal with the directory at the root of the clone.

```
npm install
npm install firebase
npm install react-native-maps --save-exact
npm install react-native-app-auth
npm install @react-navigation/native
npm install react-native-screens
npm install react-native-safe-area-context
npm install @react-navigation/native-stack
npm install --save react-native-vector-icons
npm i -S react-native-get-location
npm install --save firebase-encode
npm install --save react-native-webview
```

Use the following commands to start the application.

```
npx react-native start
npx react-native run-android
```
